Hi Drew and Ben,

Good chatting with you both today!

@Ben Churchill let us know if you have any questions about integration of the SDK.

@Andrew Poley - Here are the endpoints you should send your ref cam streams to. Happy to help later this week when we get the cameras too.

We recommend doing stream redundancy for this feed so we are providing 2 ingest points for your ref-cam. If you are unable to send the feed twice, let us know. Once streams are being published, open the viewer URL + subscribe token appended to the end to securely watch the stream. We will be generating a new subscribe token that will be used for the audience members in the stadium once we have all of the IP addresses of the Starlinks.

Hi Andrew and Ben,

Hope the prep for this weekend has been going well.

Wanted to let you know that Fabien and I are ready for the IP addresses of the Starlinks whenever they are ready to add to the stream tokens we created.

Please also let us know whenever the Ref Cam will be live later today so we can help test.

@Ben Churchill - let us know if you have questions about the SDK integration!

Best,

Thanks for this update, we can see the feeds coming in!

It looks like you are sending us a 1080p@29.97fps feed in both regions (good!). Will the actual ref cam be using the same resolution?  
I have pinned up a pair of Cloud Transcoders so we can generate more quality layers for the feed.

Could you please point the streams to the following two URLs instead:

Thank you, Aly! We are looking forward to seeing the success of this event.

@Ben Churchill anything we can help with on the website player ahead of kickoff?

@Andrew Poley still getting signal from you all, and I believe seeing the ref cam angle now!

Thanks,  
Jaye
